

WE DESTROY THE TUMOR NOT THE PROSTATE

OUR SERVICES

- ⊕ IRE NanoKnife for prostate cancer
- ⊕ Immunotherapy for prostate and bladder cancer
- ⊕ Photodynamic therapy (PDT) for bladder cancer, prostate cancer and more
- ⊕ Prostate cancer diagnostics using mpMRI with an endorectal coil
- ⊕ Fusion prostate biopsy (perineal, targeted, MRI-guided, fused)
- ⊕ Ejaculation-preserving prostate reduction for BPH (Rezum / Green Light laser)
- ⊕ Pain therapy

In order to achieve the best possible medical outcome and to avoid side effects, every treatment is individually planned and carried out for each patient.

TREATING
PROSTATE CANCER SAFELY
AND GENTLY

www.vitusprivatlinik.com/en/

THE **VITUS** PRIVATE CLINIC

Medical expertise, an exclusive ambience and a central location in the Rhine-Main area. That is the **VITUS** Private Clinic. Our clinic is only a few kilometres from the international airport and the financial metropolis of Frankfurt am Main. Founded by Prof. Dr. Stehling, who is one of the world's leading specialists in the field of focal therapy for prostate cancer, the **VITUS** Private Clinic will offer you the best treatment options.

From the beginning and up until 2023, Prof. Dr. Stehling and his team of experienced experts have already successfully treated over 1500 patients with Irreversible Electroporation (IRE).

OUR **FACILITIES**

- ⊕ 6 single rooms, 1 double room
- ⊕ Network connection and WLAN
- ⊕ Functional medical beds
- ⊕ Towels and bathrobe
- ⊕ High quality toiletries
- ⊕ Air conditioning
- ⊕ Safe
- ⊕ Individual catering
- ⊕ HD TV

RELAX
IN AN EXCLUSIVE
AMBIENCE

AN ACCURATE DIAGNOSIS
IS THE FOUNDATION
OF ANY SUCCESSFUL TREATMENT

TREATING PROSTATE CANCER **GENTLY**

With the Irreversible Electroporation (IRE / NanoKnife) and Photodynamic Therapy (PDT), we have established new and gentle treatments for prostate cancer at the **VITUS** Private Clinic. We destroy the tumour, not the prostate.

In most cases prostate cancer is a slowly progressing disease. Please take your time and inform yourself in detail. We will be happy to help you make the right decision.

- YOUR **BENEFITS**
- ⊕ No incontinence
 - ⊕ No erectile dysfunction (impotence) 0 - max. 10%
 - ⊕ Precise diagnostics (MRI, precision biopsy)
 - ⊕ Minimally invasive treatment
 - ⊕ No rehab necessary
 - ⊕ Short treatment duration

PROSTATE-**MRI**

The significance between a prostate MRI compared to other diagnostic methods is so much more superior, that an MRI should always be performed whenever cancer is suspected. If there is a (clinically relevant) carcinoma to be treated, a prostate MRI can detect it with an accuracy of about 95 %. The size and extent of carcinomas in the prostate can be detected with great accurateness, and any growth beyond the capsule can be detected with almost 100% certainty. Prostate MRIs can both avoid unnecessary biopsies and if they would be necessary, they can increase the precision of biopsy.
